

# Quick Coupler Systems For Loaders

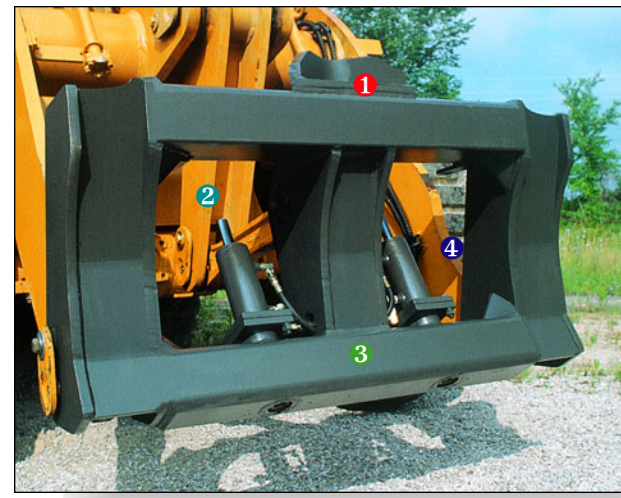

**ACS.**  
INDUSTRIES, INC.

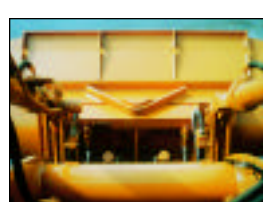

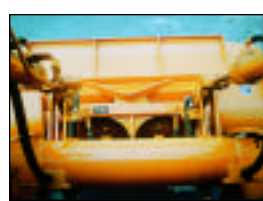

*Quality That Works*®

# Quality That Works®

The ACS Pro Series 2000® is the only quick coupler system that allows complete interchangeability of attachments among wheel loaders from any manufacturer. The compact design balances strength with performance, keeping the payload close to the loader. The Pro Series 2000® features the ACS original single-point hookup. These features have given the patented ACS Quick Coupler system a reputation for being the best in the world.

- ❶ The "ACS Exclusive" self-aligning single-point hookup provides fast, smooth coupling to any attachment – even on rough, uneven terrain. Instead of trying to line up your loader to attach into two hooks, the operator only has to attach into one – the coupler does the rest!
- ❷ The ACS open frame construction allows the operator to clearly see when coupling and uncoupling attachments. Hydraulic actuation allows the operator to lock and unlock the coupler from the cab with no need for assistance.
- ❸ Over 300 square inches of structure are in contact between the ACS Quick Coupler and the loader attachment. The coupler system is strong, tight and durable...no twisting or bending even under the heaviest of loads. Face plate contact evenly distributes the forces from the attachment. The result is long, trouble free Quick Coupler life.
- ❹ ACS Quick Couplers come complete with all plumbing and valving required to operate the Quick Coupler system. ACS Quick Couplers are engineered to run off existing loader hydraulic systems.

The Pro Series profiled shape fits the contour of the bucket and keeps the load close to the loader – increasing your payload – the best in the industry!

Turn any wheel loader into a tool-carrier with ACS's full line of coupler-equipped attachments. With the flexibility of different attachments, loaders become as versatile as job sites demand. And, with Pro Series 2000® interchangeability, you can easily exchange attachments among various brands of loaders. ACS also offers compatible female blanks to adapt your existing loader attachments.

# PRO SERIES 2000®

The Quick Coupler System that interchanges attachments no matter which loader you own.

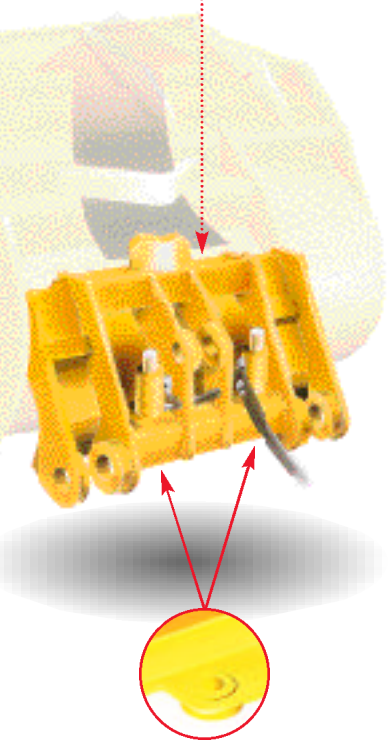

The Pro Series 2000® coupler is designed for both 3-Arm and 4-arm loaders. This patented state of the art coupler incorporates design features that translate into specific user benefits, such as:

- Single point hookup...operator friendly, truly "quick" coupling
- Lowest CG Extension in the Industry...maximize loader payload
- Open frame design...attachment visibility
- Attachment interchangeability...simplifies attachment inventory

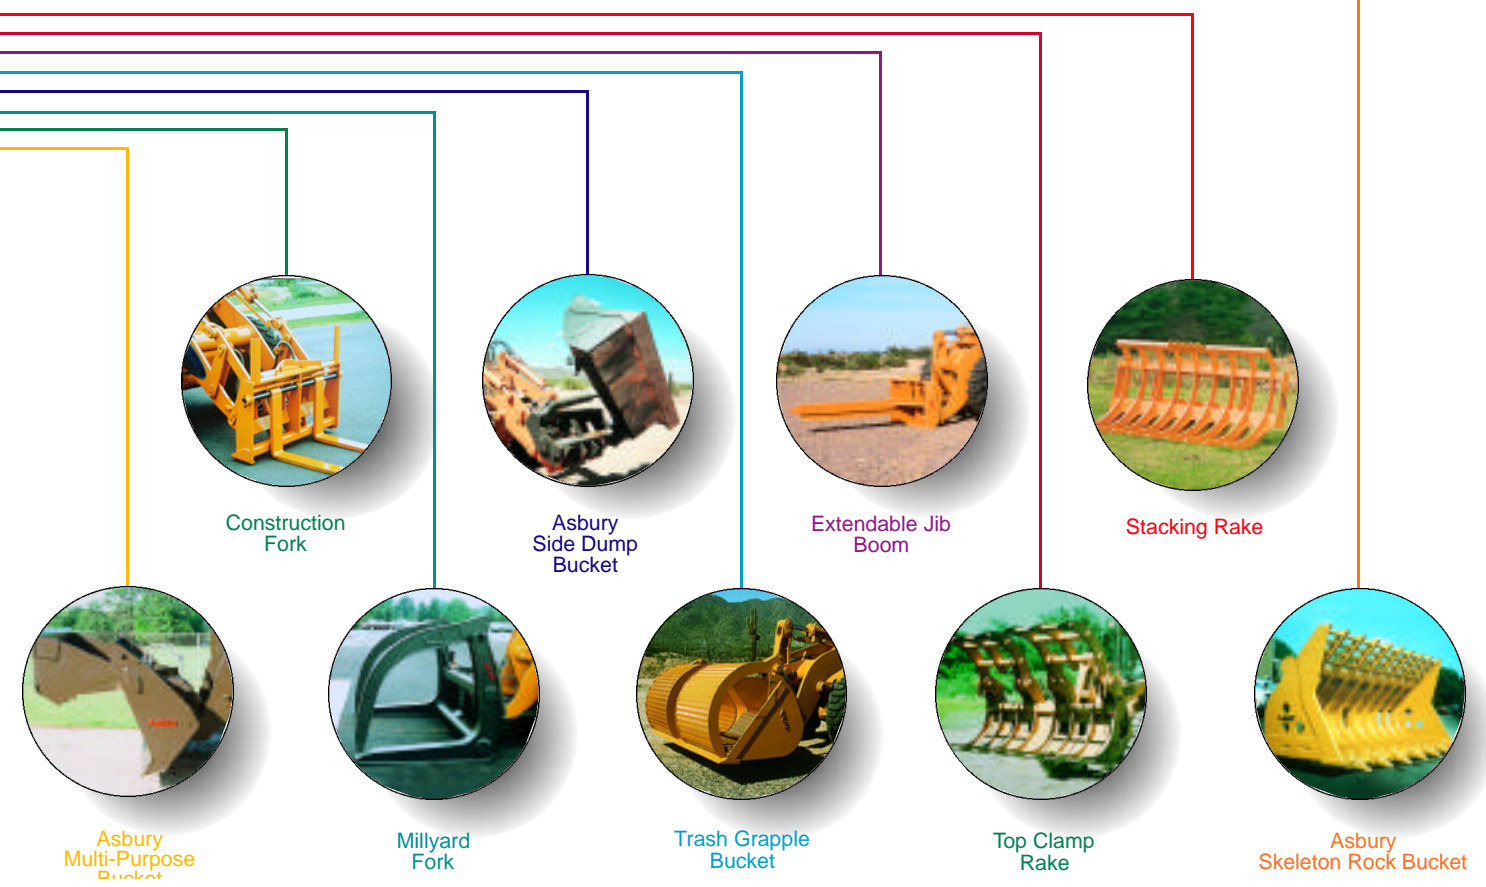

The Pro Series 2000® coupler design permits similarly sized loaders to share the same attachments, no matter which manufacturer. Now you can make loader purchasing decisions on loader performance and dealer support, and still have attachment interchangeability.

With innovative engineering, service and performance advantages found only at ACS, the Pro Series 2000® Quick Coupler System has become the first industry standard coupler system on the market today... and your preferred choice.

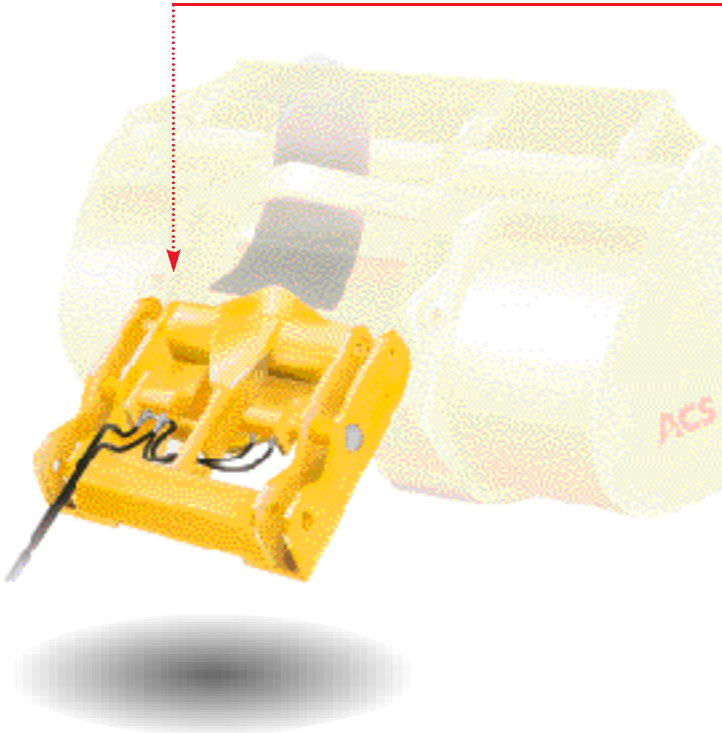

Patent #4,963,071

## LOADER ATTACHMENTS

# S E R I E S 1 0 0 0

The Quick Coupler System with more years of proven performance than any other on the market today.

We established our reputation as the leader in attachment changeover technology with the ACS Series 1000 Loader Coupler System. Highly regarded for its dependability, the Series 1000 Coupler System is available for all 4-arm and Z-bar wheel and track loaders and tractor-loader-backhoes...even motor graders.

The Series 1000 coupler was the innovator for the quick coupler industry, introducing the "single-point hookup" to the marketplace. The Series 1000 also features an open frame design, full faceplate contact, and heavy-duty construction. It is suitable for crawler loaders, larger (5 yard and up) wheel loaders, motor graders.

Since 1968, the ACS Series 1000 Coupler System has provided outstanding service for thousands of contractors, municipalities, utilities, state agencies and all branches of the military.

## ACS Industries, Inc. Products

### Wheel & Crawler Loaders

Manual Coupler Systems  
Automatic Coupler Systems  
General Purpose Buckets  
Multi-Purpose (4-in-1) Buckets  
Light Material Buckets  
Side Dump Buckets  
Rock Buckets  
Spade Nose Buckets  
Coal & Stockpile Buckets  
Construction Forks  
Wide Carriage Log & Lumber Forks  
Double Top Clamp Forks  
Paddle Top Clamp Forks  
Pipe Grapple Forks  
Hydraulic Adjustable Forks  
Logging Forks  
Car Body Forks  
Stacking Rakes  
Clearing Rakes  
Top Clamp Rakes  
Extendable Jib Booms  
Backfill Blades

### Railcar Couplers

Trash Grapple Buckets  
Scrap Grapple Buckets  
Barrel Handler

### Tractor-Loader-Backhoes

Automatic Coupler Systems  
Manual Coupler Systems  
Utility Forks  
Low Profile I.T.A. Forks  
High Frame Construction Forks  
Wide Carriage Forks  
Top Clamp Forks  
General Purpose Buckets  
Multi-Purpose (4-in-1) Buckets  
Light Material Buckets  
Snow Buckets  
Trash Grapple Buckets  
Scrap Grapple Buckets  
Side Dump Buckets  
Top Clamp Rakes  
Backfill Blades  
Extendable Jib Booms

### Loader Rakes

Hydraulic Thumbs  
Mechanical Thumbs  
Rakes  
Grapples  
Backhoe Buckets  
Backhoe Couplers

### Excavators/Compact Excavators

Hydraulic Coupler Systems  
Manual Coupler Systems  
Hydraulic Thumbs  
Manual Thumbs  
Grapples  
Rotating Grapples  
Rakes  
Ripper Tooth  
General Duty Buckets  
Heavy Duty Buckets  
Poly-lined Buckets  
Severe Duty Buckets  
Clean-out Buckets  
Stump Shears

### Dozers/Graders

Blade Rakes  
Low Profile Radial Rippers  
Trunnion Radial Rippers  
Parallel Rippers  
Adjustable Parallel Rippers
